CERTIFIED MAIL # P 442 685 405

February 14, 1985

Mr. Stephen M. Zenzel, Plant Engineer
Owens-Illinois
P.O. Box 210
Bristol, Pa. 19007

SUBJECT: Violation Notice
Unapproved Discharges of Industrial
Wastes to State Waters
Owens-Illinois
Bristol Township, Bucks County

Dear Mr. Zenzel:

On February 4, 1985, Peter G. Noll, Environmental Protection Specialist with this Department, conducted an inspection at your plant located at 2707 State Road. It was learned that steam condensate is discharged to a storm sewer at the rear of the plant, hence to Hog Run Creek, a tributary of the Delaware River. It was also found that spillage from a dumpster had been reaching a storm drain in the past.

The actual or potential discharge of industrial wastes as described to State Waters is a violation of the Pennsylvania Clean Streams Law and Chapter 101, Special Water Pollution Regulations. (copy enclosed).

We realize that Owens-Illinois is contemplating corrective measures. However, we need a written statement from you within seven days of your receipt of the notice describing the corrective measures being taken to abate the aforementioned unapproved discharges.

Sincerely yours,

Albert W. Wills, P.E., Chief
Division of Environmental Engineering
